Java Backend Engineer with **1 year of full-time experience** developing and supporting enterprise applications using **Java, Spring Boot, J2EE, JDBC, JPA, REST APIs, and MySQL**. Experienced in backend development, application debugging, log analysis, defect resolution, API troubleshooting, automated testing, and microservices. Strong understanding of **SQL, OOP, SDLC, Agile, and backend architecture,** with hands-on experience building reliable and maintainable backend services.

SKILLS

Language: JAVA (8/11/17), SQL, JAVASCRIPT (ES6+)

API & Integration: RESTful APIs, JSON, API Integration, JWT Authentication, HTTP Methods, Error Handling

Backend Technologies: J2EE, Servlets, JSP, JDBC, JMS, JPA, Hibernate, Spring Boot, Spring MVC, Spring Data JPA, Spring JDBC, Spring Security, RESTful APIs, Microservices, Spring Cloud Gateway

Database: MySQL, SQL

Testing: Jest, React Native Testing Library, JUnit 5, Mockito, Integration Testing

Build, DevOps & Tools: Git, GitHub, GitHub Actions, CI/CD, VS Code, Postman, Docker, Maven

Core Concepts: OOP, DSA, Collections, Design Patterns, SOLID Principles, Component Architecture, State Management, SDLC, Agile, Debugging, Performance Optimization

EXPERIENCE

Java Developer | YourDOST Jan 2026 – Present

- Developed and maintained s**calable backend services** using **Java, Spring Boot, Spring JDBC, REST APIs, and MySQL.**
- Designed and implemented **RESTful APIs** for appointment booking, tracking, communication, and business workflows.
- Implemented b**ackend business logic, database operations, validation, exception handling, and audit logging** using Spring JDBC, JPA, and Hibernate.
- Built **multi-channel notification** workflows across Email, SMS, WhatsApp, and telephony with scheduled job processing.
- Debugged and resolved **production issues** using API testing, log analysis, database inspection, and rootcause analysis.
- Collaborated with frontend/backend teams to deliver and troubleshoot production features.
- Used **Git, GitHub, Postman, and Agile** practices for development, testing, and delivery.

Software Developer Intern | Netlink Dec 2024 – Mar 2025

- Developed backend modules for enterprise applications using J**ava, Spring Boot, Spring Data JPA, Hibernate, and JPA Criteria API**.
- Implemented secure **API routing, traffic management, and gateway services** using Spring Cloud Gateway and microservice architecture principles.
- Designed and developed an **HTML-to-PDF generation module** for dynamic document creation, reporting, and business process automation.
- Increased automated test coverage from **30% to 96%** using JUnit and Mockito, improving application quality, maintainability, and release confidence.

PROJECTS

CodeArena Compiler & Code Execution Platform | Java, Spring Boot, Docker, MySQL

Backend Developer | Live

- Developed REST APIs for **code submission, compilation, execution, result retrieval, and execution-status tracking**.
- Designed isolated code execution workflows using **Docker** to provide consistent runtime environments.
- Implemented validation, exception handling, execution monitoring, and result processing.
- Used **MySQL** for storing submission and execution of metadata.
- Tested and debugged APIs using **Postman**.

Notification Hub | Java, Spring Boot, Kafka, MySQL, Docker

Backend Developer

- Developed an event-driven **notification platform** supporting **Email, SMS, and WhatsApp** communication workflows.
- Implemented asynchronous message processing using Kafka with retry and failure-handling mechanisms.
- Designed REST APIs, audit logging, delivery tracking, and scheduler-based notification services.
- Containerized services using Docker and automated testing with JUnit for reliable deployments.

EDUCATION

Oriental Institute of Science and Technology, Bhopal, Madhya Pradesh Oct 2021 – Jun 2025
B. Tech | Computer Science and Engineering in Data Science | 79.90%

Sushant Public School Noonfara, Muzaffarpur, Bihar Apr 2019 – May 2021
12th | PCM | Central board of Secondary Education | 81.6%

CERTIFICATIONS

- DSA Using Java | NPTEL
- SQL for Data Analytics | Internshala
- Spring Boot | LinkedIn Learning

ACHIEVEMENTS

- Developed and integrated **RESTful APIs using Java and Spring Boot** for mobile and enterprise application workflows.
- Improved backend application reliability by **debugging issues, optimizing existing services, and implementing scalable solutions**.
- Solved **500+ DSA problems** across coding platforms.
